

UV DESIGN KIT

The Ultimate Kit for Ultraviolet Designers

The GB-UV1 Kit provides components used in the medical, pharmaceutical, security, gaming, automotive and aircraft industries. Various wavelengths of emission, voltage inputs for power requirements and sizes make this kit uniquely valuable for prototype and developmental efforts.

GB-UV1 contents include:

- Ultraviolet lamps of various shapes and sizes.
- 19 Inverters.
- High-intensity UVC to UVA blacklight.
- Both LED and CCFL Ultraviolet lamps.
- Cabling and other accessories.

JKL Components comprehensive assortment of lamps, inverters, wire and accessories included in the kit enables designers to shorten design times, lower development costs, reduce risk of redesign and ultimately expedite time to market for business and scientific success.
