TECH BRIEF

# THE ELECTROMAGNETIC SPECTRUM

The chart below shows a portion of the electromagnetic spectrum, with emphisis on the ultraviolet and visible light portion of the spectrum. This should be useful in indicating the relationship between the various radiant energy wavelength regions. Please note that there are no boundaries from one region of the spectrum to another. Instead there is a gradual transition from one region to the next.

Tech Brief No.: TB-1006 rev. A
