

# LED DESIGN KIT

GB-LED1

## Comprehensive Selection of LED Lighting Technologies

JKL Components Corporation's new GB-LED1 designer kit includes a full compliment of LED technologies and accessories appropriate for most design and product development needs.

### **GB-LED1 contents include:**

- Component LEDs - both surface mount and through board models.
- Rigid bars and flexible ribbons for linear lighting & LCD backlighting.
- High-power 1-3-5 Watt output for general lighting.
- Incandescent replacement styles such as festoon and wedge based.
- G-4 and MR16 formats.
- RGB LEDs, ultraviolet devices and a wide variety of white shades.
- Special lenses and color filters for LED technologies.

In addition to the wide spectrum of LED lamps, the kit contains sockets, LED drivers and components needed for fast prototyping and on-time project completion.
