

ENVIRONMENTAL POLICY

Our commitment

JKL Components Corporation recognizes that its activities impact on the environment. Consequently JKL embraces the principles of sustainable development and is committed to a process of continual environmental improvement and pollution prevention.

To accomplish this, JKL Components Corporation is committed to protecting the environment through:

- Making better use of the Earth's resources
- Improving its production methods when possible
- Reducing harm to the environment
- Comply with all laws
- Use of biodegradable and recyclable packaging when possible.

JKL Components Corporation believes that only in this way will it nurture and sustain a lasting, viable business.

Our aims

- **Minimize and conserve** - We shall identify opportunities to reduce the resources we consume including energy, water and other natural resources, thereby also minimizing the amount of waste we produce. Where practicable, we shall reuse materials, recycle waste and procure recycled products.
- **Comply** - We shall endeavor to comply with all relevant environmental legislation and regulations. Moreover we shall treat these as the minimum standard and seek to exceed them wherever possible. *Please see individual compliance statements where needed related to RoHS, Reach, WEEE and Conflict Minerals.*
- **Involve and communicate** - We shall communicate our policy to employees, suppliers, business partners and the public and provide the necessary training and resources to support our policy.
